SUPPORT

BOOST YOUR MIPS SCORES

Join the Centers for Medicare & Medicaid Services (CMS) Quality Innovation Network–Quality Improvement Organization (QIN-QIO) under the 13th Scope of Work (SOW) to **enhance care quality for Medicare beneficiaries while improving performance under the Merit-based Incentive Payment System (MIPS)**. Streamline data collection and integrate proven improvement activities with **FREE**, tailored support and actionable analytics from Superior Health Quality Alliance.

Superior Health Delivers Results

- **Direct Technical Assistance:** No-cost, evidence-based support for disease prevention, chronic disease management, behavioral health, opioid safety, care coordination, patient safety, and emergency preparedness.
- **Data-Driven Improvement:** Practical analytics and best practices that strengthen workflows and infrastructure, ensuring sustainable quality improvements.

Operational and Infrastructure Support

- Optimize workflows to improve documentation.
- Strengthen emergency preparedness and clinic infrastructure to stabilize operations.

Strategic Partnership Advantages

- **Maximize MIPS Performance:** Expert guidance to improve quality and cost.
- **Prepare for Value-Based Care:** Build readiness for future population health initiatives.
- **Sustain Change:** Optimize workflows, infrastructure, and emergency preparedness for long-term impact.

Ready-to-Use Resources

- Chronic disease education
- Immunization improvement resources
- Patient safety and fall prevention toolkits
- Opioid safety and medication management
- Care coordination resources

Support for Key Quality Measures

**Diabetes A1c Poor Control (>9%)
(MIPS: CMS122v13, Quality # 001)**

- Tools, training, and data to reduce uncontrolled A1c rates.

**Controlling High Blood Pressure
(MIPS: CMS165v13, Quality # 236)**

- Monitoring and self-management resources to improve BP control.

**Depression Screening and Follow-up
(MIPS: CMS2v14, Quality # 134)**

- Screening templates, follow-up protocols, and care coordination to meet measure requirements.

**Fall Risk Screening
(MIPS: CMS139v13, Quality # 318)**

- Safety toolkits and prevention protocols to reduce patient safety risks.

**Hospital-Wide 30-Day Readmission
(MIPS: Quality # 479)**

- Improve care transitions and reduce readmissions, impacting both quality and cost.
