

# Superior Health Quality Alliance Implementation Strategies

We work collaboratively with patients and providers to improve care across the care continuum

Achieve targeted goals and objectives

## Independent Implementation

*Designed for greater autonomy in (QI) quality improvement*

Unlimited access to Superior Health resources (videos, elearning, webinars)

Flexibility to adopt best practices at your own pace

*Optional participation in all three areas*

*Flexibility to move in and out of approaches as needed*

## Affinity Groups

*Designed for online learning*

Connects participants virtually across the region for a diverse and collaborative learning experience

Virtual communities organized by healthcare setting and topics of interest

## Structured Collaboratives

*Designed for large scale improvement*

Small collaborative groups to enhance learning

Intensive approach to assisting and supporting implementation of proven interventions

Real-time collaborative sessions focused on sharing, tracking and monitoring improvements

*Networking with our partners across the region*

## The Five Strategic Goals\*

Increase Quality of Care Transitions

Increase Patient Safety

Increase Chronic Disease Prevention and Self Care

Improve Nursing Home Quality

Improve Behavioral Health Outcomes Including Opioid Misuse

\*Designed to improve patient outcomes
