

Laundry Services Checklist for Environmental Services (EVS)

Directions

Evaluate the following high touch surfaces.

Date Completed: _____

Unit: _____

Completed by: _____

Laundry Handling	Assessment Yes / No	Comments
Performs hand hygiene and wear gloves prior to handling soiled linens.		
Soiled linen is separated from clean linen prior to transport.		
The sorting of contaminated linens is conducted away from patient care areas.		
Designated linen bins are clearly labeled and easily understood.		
Contaminated linens are not rolled and not shaken.		
Linens are not placed on the floor.		

Transportation	Assessment Yes / No	Comments
Linen is covered to prohibit contamination during transport.		
Soiled linen is placed inside a bag prior to using a laundry chute.		
Clean linen is separate from soiled linen during transport in some physical way.		
The linen container is not overfilled and is securely placed within the bin.		
Transportation bins are regularly cleaned with the facility's U.S. Environmental Protection Agency (EPA) approved disinfectant product.		
Hand hygiene is conducted after transport of linens is complete.
