

# CHANGE IN CONDITION WATCH & REPORT!

Everyone is expected to watch for and report any changes in our patients' condition. Early recognition and reporting to the nurse or supervisor improve health outcomes and quality of life.

## Physical Changes

- ◆ Walking
- ◆ Level of weakness
- ◆ Falls
- ◆ Urination and bowel patterns
- ◆ Skin
- ◆ Vital signs

## Non-Physical Changes

- ◆ Mood
- ◆ Confusion/change in alertness
- ◆ Appetite
- ◆ Sleeping
- ◆ Speech
- ◆ Complaints of pain

### DID YOU KNOW?

Many patients who experience worsening outcomes show early warning signs.

ALWAYS BE ON THE LOOKOUT FOR THESE CHANGES, WHICH WILL LIKELY REQUIRE FURTHER ASSESSMENT BY THE NURSE.
